

CARL ANDREI H. DEL ROSARIO

Full Stack Developer | andrei.huyoa.me@gmail.com | github.com/andreihuyoa | +63 9771903534 | andreihuyoa.dev

EXPERIENCE

Full Stack Developer

March 2025 – June 2026

Shinka Studios

- Built and maintained full-stack features for the Keystone Appraisal platform using Next.js and Go/Echo.
- Updated frontend and data workflows to support new database structures and improve system compatibility.
- Built automated DOCX appraisal report generation with Azure-based file delivery.
- Developed Python pipelines to extract property sales data from municipal PDF and DOCX sources and generate bulk SQL insert scripts.
- Created an internal browser extension that automated Keystone appraisal data collection and reduced manual data entry.
- Contributing to the full redesign of PH Business Network's website, focusing on SEO readiness, content structure, user experience, and MDX-based blog and gallery pages.
- Resolved around 20 tickets weekly across feature requests, bug fixes, and production support while participating in daily stand-up meetings to align priorities and progress with the development team.

Full Stack Developer Intern

February 2026 – June 2026

Strastan Solutions Corp.

- Developed frontend features for a virtual events platform using Next.js 14 and TypeScript, integrating REST APIs through typed client modules and session-based authentication.
- Built and tested AWS Lambda CRUD handlers and API Gateway REST endpoints for event management using AWS CDK.
- Created a Postman collection for core API endpoints to support team testing, debugging, and onboarding.

Frontend Developer | UI/UX Design

April 2024 - May 2024

Freelance

- Developed responsive layouts and adapted website components to ensure consistent experience across desktop, tablet, and mobile devices. Debugged and fixed frontend issues in the codebase.
- Contributed to Figma design updates and reusable frontend component development.

PROJECTS

Healthcare Recommendation Model | Lead Developer & Researcher

September 2025 – December 2025

Thesis Research Project

- Deployed a hybrid recommendation API using Flask, content-based filtering, Neural Network, and Haversine distance to match users with healthcare facilities in Ermita, Manila.
- Achieved 80.7% Recall@5 and a Mean Average Precision of 0.65, validating the model's accuracy against synthetic user dataset.
- Utilized Amazon S3 for storage and retrieval of healthcare datasets and trained machine learning models.

Lokalista | Lead Full-Stack Developer

July 2024 – August 2024

Capstone Project

- Developed a full-stack web application for managing freelancers, tasks, and teams with MySQL (Laravel Eloquent ORM) and Paymongo payment integration.
- Created user manuals, scope planning, work breakdown structure, and project schedules.

TECHNICAL SKILLS

- **Languages & Frameworks:** TypeScript, Go, Python, HTML, CSS, Next.js, Expo (React Native)
- **Databases & Cloud:** MySQL, PostgreSQL, AWS (Lambda, API Gateway, CDK, Cognito), Azure, Docker, Git, Github
- **Tools:** Postman, Swagger, Mapbox GL, Cursor, Claude Code, Codex

CERTIFICATIONS

Developing Secure Software (LFD121)

April 2025

Blockchain: Understanding Its Uses and Implications (LFS170)

March 2025

Business Intelligence Fundamentals

November 2024

AWS Cloud Practitioner Essentials

August 2024

Enterprise Design Thinking Practitioner from IBM

March 2023

EDUCATION

Adamson University

August 2021 – July 2026

BS Computer Science

- Led the development of a Barangay Management System for Barangay 48, Pasay City. Replaced manual record-keeping to help barangay officials efficiently manage and sort senior citizen records.
