CARL ANDREI H. DEL ROSARIO

Full Stack Developer | andrei.huyoa.me@gmail.com | github.com/andreihuyoa | +63 9771903534 | andreihuyoa.dev

EXPERIENCE

Full Stack Developer **March 2025 - August 2026**
Shinka Studios

- **Keystone Appraisal -** Built and maintained full-stack features using Next.js and Go/Echo; adapted frontend and data workflows to evolving database structures.
- **Automation & Internal Tools -** Built automated DOCX appraisal reports with Azure file delivery, Python extraction pipelines for municipal PDF/DOCX data, and a browser extension that reduced manual appraisal data entry.
- **PH Business Network -** Rebuilt the website frontend in Next.js to improve SEO readiness, site structure, user experience, and maintainable MDX content; joined stakeholder meetings to gather requirements, review progress, and align implementation with business goals.
- **Delivery & Support -** Managed ~20 weekly tickets across features, bug fixes, and production support, while coordinating priorities and progress through daily team meetings.

Cloud Full Stack Developer Intern **February 2026 - June 2026**
Strastan Solutions Corp.

- Led a six-member full-stack development team, translating project manager directives into clear workstreams, delegating responsibilities based on individual strengths, and coordinating delivery to keep the team aligned and productive.
- Developed frontend features for a virtual events platform using Next.js 14 and TypeScript, integrating REST APIs through typed client modules and session-based authentication.
- Built and tested AWS Lambda CRUD handlers and API Gateway REST endpoints for event management using AWS CDK.
- Created a Postman collection for core API endpoints to support team testing, debugging, and onboarding.

PROJECTS

Healthcare Recommendation Model | Lead Developer & Researcher **September 2025 – December 2025**
Thesis Research Project

- Deployed a hybrid recommendation API using Flask, content-based filtering, Neural Network, and Haversine distance to match users with healthcare facilities in Ermita, Manila.
- Achieved 80.7% Recall@5 and a Mean Average Precision of 0.65, validating the model's accuracy against synthetic user dataset.
- Utilized Amazon S3 for storage and retrieval of healthcare datasets and trained machine learning models.

Lokalista | Lead Full-Stack Developer **July 2024 – August 2024**
Capstone Project

- Developed a full-stack web application for managing freelancers, tasks, and teams with MySQL (Laravel Eloquent ORM) and Paymongo payment integration.
- Created user manuals, scope planning, work breakdown structure, and project schedules.

TECHNICAL SKILLS

- **Languages & Frameworks:** TypeScript, Go, Python, HTML/CSS, Next.js, Expo/React Native
- **Cloud & Data:** AWS (Lambda, API Gateway, CDK, Cognito, S3), Azure, MySQL, PostgreSQL, Docker, Git/GitHub
- **AI-Assisted Development:** Claude Code (Skills), OpenAI Codex, MCP, agentic workflows, context/harness engineering
- **Tools:** Cursor, Postman, Swagger, Mapbox GL

CERTIFICATIONS

Developing Secure Software (LFD121) **April 2025**
Blockchain: Understanding Its Uses and Implications (LFS170) **March 2025**
Business Intelligence Fundamentals **November 2024**
AWS Cloud Practitioner Essentials **August 2024**
Enterprise Design Thinking Practitioner from IBM **March 2023**

EDUCATION

Adamson University **August 2021 – July 2026**
BS Computer Science

- Led the development of a Barangay Management System for Barangay 48, Pasay City. Replaced manual record-keeping to help barangay officials efficiently manage and sort senior citizen records.
